

Universities, Industry, RTOs and SMEs partnerships

- **Need for the most efficient research & innovation at the global scale**
 - Networks to widen the perimeter, provide the right education, increase visibility and “revenues” and attract the best professors, researchers, students
 - Common and professional management rules and organisations (work together) should be rewarded and encouraged (but risk is accepted)
- **Ease universities-industry new partnerships**
 - ETPs SRAs, calls for ideas...
 - Simpler access to new partners and better identification of potential partners
- **Homogeneous regulatory/fiscal conditions** from regions to EU
 - Common procedures and “incentives”
i.e European foundations for science/chairs, mobility between academia/industry
- **Build on long term joint work in confidence**
 - Stable organisations including SMEs, agreed IP rules and instruments,
 - Industry in boards, scientific advice to industry, role of RTOs
 - Long term impact assessment for “reward” to allow creativity
 - ***EIT opportunity***
