

**The future of Science and Technology in Europe  
Parallel 2<sup>nd</sup> Session**

**Governance issues and  
links with the Lisbon  
Strategy**

Valeria Bandini  
ASTER Science Technology Business

# Key Issues

- Coordination of policies at the vertical and horizontal level
- Policy learning and capacity building
- Coordination: a need but also a cost
- Coordination as a response to fragmentation
- Synergies among knowledge related policies
- Competition for efficiency and excellence
- Involvement of all stakeholders
- ERA as “open market for research”
- More visibility of the process, communication on ERA to a wider community
