

Research Infrastructures (PS8)

Prof. Iain W. Mattaj
Director General

European Research Infrastructures

- Do we need a single European process for new infrastructures and what criteria should be applied?
- What are the bottlenecks for the implementation of the roadmap projects and how could they be overcome?
- Are there models that could be used? How should RIs be funded?
- Are virtual organizations that link infrastructures in a number of countries at different institutions a viable solution?
- Should we develop general criteria for management of and access to RIs?
- Can we differentiate between service facility and host institution and what are the components of a well-functioning infrastructure?
- Do we need global collaborations?
