Oxford Meeting

Guidelines for the next steps of Knetworks

Cristobal Cobo, OII

Activity		
1	Preparation of the Project	Done
2	Project Management and Coordination	On going
3	Methodology Development Identification of Analysis and Validation Criteria of E-government Good Practices	Done
4	Defining the Thematic Approach and Good Practices Projects Assessment	?
5	Creation of a Virtual Collaborative Platform (K@networks)	FUAC-U.Cantabria-CEGER
6	Research and Development for Building a European Knowledge Center (EKC)	?
7	Broadening the Cooperation Network	?

1. Basic Presentation of the Common Methodology Paper.
    1. Feedback.
    2. No inclusion of 'Lit Review'.

2. Theoretical Paper as a core of literature review.
    1. Feedback.
    2. Lack of connection.
    3. Individual research has a 'Lit Rev'

Lit Review + Common Methodology

Potential scenarios:

Lit Review + Common Methodology

6 research projects > European Knowledge Centre

Answering the Lit Rev questions per partner.

The final paper should then be a discussion of the orientation of KNetworks to
1.   networks - the general introduction so that we establish a difference between general networks and Knowledge networks
2.   knowledge networks where we exemplify different views of (different) knowledge networks in our 6 projects.
3.   and discuss in particular knowledge networks enacted through ICT and show how the role and effect of ICT varies in different circumstances

It is expected that the concepts included in this document, as well as the idea of networks as a flexible but resilience structure, will provide value to the activities planned by the members of the KNwetworks project, particularly for the following work packages:

Activity 4: Defining the Thematic Approach and Good Practices Projects Assessment
Activity 6: Research and Development for Building a European Knowledge Center (EKC)
Activity 7: Broadening the Cooperation Network

$$\frac{\text{Common Methodology} +}{\text{Good Practices} +}$$

$$\frac{\text{Platform} +}{\text{EKC}}$$
