

Digital Agenda for Europe

Going Local Portugal 2011 Coimbra – 13th of December 2011

Programme

9:00 – 09:45	Opening Session
	João Gabriel Silva, Rector of University of Coimbra
	Mário Campolargo , DG Information Society and Media, European Commission
	João P. B. Melo, Mayor of the city of Coimbra
	Luís Magalhães, Portuguese Representative on the High Level Group for the Digital Agenda for Europe in Portugal, President of UMIC – Knowledge Society Agency
09:45 - 10:30	Portugal and the Digital Agenda for Europe
	Carlos Morais Pires, DG Information Society and Media, European Commission
	Henrique Madeira , Vice-Rector of University of Coimbra, Institutional Framework
10:30 - 11:00	Break
	Research and Knowledge Infrastructures - Expectations and Priorities
	Research and Knowledge Infrastructures – Expectations and Priorities Adequate research and knowledge infrastructures are key factors to scientific excellence, better education, building new competences, developing new technological solutions and promoting a fruitful dialogue among ICT stakeholders. The Portuguese research community is, nevertheless, faced with important challenges in the years to come. What are these challenges? What are the main problems for Portuguese researchers and research centres? What are their main expectations and priorities?

(Opendata and Knowledge Infrastructures) Amílcar Cardoso, Director of Centre for Informatics and Systems – University of

	Aníbal Traça, President of Institute for Systems and Robotics
	Mário Freire, University of Beira Interior
	Moderator: Fernando Boavida
12:30 - 13:30	Break
13:30 - 15:00	ICT Infrastructures and Digital Communities
	Nowadays, digital communities are typically established less by physical proximity and more through the sharing of a set of services and/or content-related processes. Naturally, many of these communities require advanced underlying ICT infrastructures to provide a network of content services and, by doing so, forming a content network. On the other hand, the users do not care about infrastructures and expect useful services/content. Issues that will be discussed in this session include the types of infrastructures that should be in place for digital communities, examples of content services and, last but not least, needs and requirements of user communities in order to build true digital communities.
	Miguel Gonzalez-Sancho, DG Information Society and Media, European Commission.
	Mário Bernardes , Director of GSIIC, University of Coimbra
	Joaquim Ramos Carvalho, Vice-Rector, University of Coimbra
	José Cunha Vaz, President of AIBILI
	Carlos Faro, Director of Biocant
	Moderator: Jorge Figueira
15:00 - 15:15	Break
	Knowledge Transfer and Dialogue with Industry
	Knowledge Transfer and Dialogue with Industry Links between research and industry, particularly SMEs, are essential to outreach local industrial players and potentiate knowledge transfer, innovation, and development activities. Joint projects are also very important, either at local, national or international levels, with the aim of maximising research and development opportunities, knowledge transfer, and exploitation of research results. Other forms of joint activities may include joint supervision of research work. This session will explore the points of view of knowledge transfer units, SMEs and the R&D community at large, in what concerns the key issues for knowledge transfer, innovation, and dialogue with industry.
