Pediatric Neuro-Enhancement

Ethical, social, and legal questions in comparison between North America and Germany

Tuesday, 08.03.2016:

09.00-09.30: *Welcome and Introduction*

09.30-10.00: Dr. Saskia Nagel: Introducing the topic

10.15-11.45: Dr. Veljko Dublejevic: Pediatric neuroenhancement, best interest and autonomy: A case of normative reversal

David Lyreskog: Neuro-enhancement at the margins of autonomy. Parenthood, surrogacy, and the best interest of the patient

12.15-13.00: Dr. Alexander Gerner: How can we enhance perspectives on pediatric (neuro)enhancement of attention?

13.30-14.30: *Lunch break* *Rosendahls*

14.30-15.45: Prof. Peter Reiner: Public attitudes towards neuroethical issues: How and why.

15.45-16.30: Nick Fitz: Children's use of stimulants: a series of randomized cross-cultural studies exploring how age, health status, gender, and race influence practical, moral, political, discriminatory, and behavioral attitudes

16.30-18.00: *Group Session:*
Brainstorming on international study: Identifying shared interests, cluster, plan coming days

Wednesday, 09.03.2016:

09.00-09.30: *Looking back and forward*

09.30-10.45: Prof. Roi Cohen Kadosh: Transcranial stimulation to the developing brain: Shall we do that?

11.00-12.30: Dr. Dorothee Horstkötter: Self-control enhancement in children. Comparing neuroscience and psychosocial measures from an ethical perspective

Jenny Krutzinna: Beyond an open future: Ethical challenges to cognitive neuro-enhancement in children

12.45-13.30: Dr. Sebastian Sattler & Jonathan Wörn: Investigating the moral acceptability and willingness to use pediatric cognitive enhancement

13.30-14.30: *Lunch break* *Zimmer Nr. 4*

14.30-18.00: *Group Session*
Plan international study ctd.

Thursday, 10.03.2016:

- 09.00-09.30: *Looking back and forward*
- 09.30-10.45: Prof. Ilina Singh: Clinical Management of Neuroenhancement in Young People: Engagement with the Critics
- 11.00-12.30: Ioana Petr: Explaining gender differences in the diagnosis of ADHD in children
- Dr. Christoph Schickhardt: Should the state ban neuro-enhancement in children?
- 12.45-13.30: Dr. Cliodhna O'Connor: Parenting as neuro-enhancement: Media constructions and public reception
- 13.30-14.30: *Lunch break* *Rosendahls*
- 14.30-18.00: *Group Session*
Plan international study ctd.
- 18.30-20.00 *Public Talk (in German)* *Altes Kreishaus 41/112*
Prof. Manfred Döpfner: Medikamente und psychologische Interventionen bei Kindern und Jugendlichen mit ADHS - Therapie oder Enhancement?
- 20.00 *Conference Dinner* *Amodomio*

Friday, 11.03.2016:

- 09.00:10.30: Prof. Manfred Döpfner tba
- 10.45-12.15: Dr. Larissa Maier: Pediatric neuro-enhancement in a self-medicating society – Ethical, legal, and social considerations based on quantitative survey data from Europe and North-America
- Dr. Martin Hähnel: Neuro-enhancement and human nature
- 12.30-13.30: *Lunch break* *L'Osteria*
- 13.30-16.00: *Group Session*
Plan international study, next steps and discuss science communication
- 16.00 *Coffee and Farewell*
