

CALL FOR PAPERS

On the 22nd of February 2016 it will be held at the Faculty of Sciences of the University of Lisbon an international colloquium entitled "Realism, Substantialism & Animism: epistemological obstacles and their influence on the atom conceptions", organized by the CFCUL.

Brief presentation of the international colloquium:

We know that realism, substantialism and animism are fundamental constituents of atomism, but they comprise various forms. This colloquium aims to bring together papers which pay special attention to examining the diversity of realistic, substantialist and animist positions and evaluate the impact of this debate in the successive reformulations of the atomist theory.

Anyone who wants to present a paper at this scientific event, please send the abstract of the proposed paper (which should include the title of the communication, a brief summary and institutional affiliations), until the 14th of December, to Lídia Queiroz [lmqueiroz@fc.ul.pt]. Communications may be in English, French, Spanish or Portuguese and prepared for 20m of presentation (followed by 10m of discussion). Authors will be notified of acceptance of their abstracts on December 15th.

Papers presented at the international colloquium can be published by the CFCUL (for authors who would like to publish the paper) and submissions will undergo a review process prior to publication.

IMPORTANT DATES

14/12/2015: Call for papers deadline

15/12/2015: Notification of acceptance
