Training Opportunity for Portuguese Graduates

Title	Duty Station
Image processing (Diz Muñoz group)	EMBL Heidelberg/Germany

Domain of activity and project

Developing image processing pipelines for analysing cell polarity and motility.

Required education

IT, potentially engineer with programming experience.

Knowledge, skills and any special requirements

Programming skills required (matlab and python would be an advantage).

Training opportunity for the Graduates

We are developing new imaging tools both in cells and embryos and image processing is paramount. The graduate will collaborate with several lab members that are generating biological data at the moment.
