

# Trainee's Project Report

Job Code	GS92
Department	GS
Discipline	Civil Engineering
Supervisor	POEHLER Michael

## Description

The young engineer will support the engineers of the civil engineering design office and will progressively take in charge design tasks for small project (structure dimensioning for steel and concrete, dynamic analysis, ...), follow up works advancement and prepare users requirements documents for new projects.

## Special Requirements

Degree in Civil Engineering or related field.

## Training Value

The TS-CE Group is responsible for civil engineering design and/or works carried out on all CERN sites. The position will allow a young engineer to work in collaboration with Architects Experts, Consultants and Contractors on small civil engineering projects on surface structures or buildings on CERN sites.
