Date updated	23-JUN-15

Title

DPM, a grid data management storage solution

Description

The IT-SDC group is responsible for widely deployed solutions for grid data management, covering storage, cataloguing and file transfer, all of which play an important role in the management of the data from the LHC experiments. The section has an opportunity for involvement in the development, integration, testing and support of its storage solution, the DPM. The trainee will work on the maintenance and evolution of the product, adding core functionality and modernising the stack
