When there are only one or two research institutions, you must list 10 members to each R&D institution. When more than two research institutions/companies (if applicable) are involved, the minimum number of team members distributed in the various institution is of 25; with no more than 10 per single R&D institution or 5 per company. In the case of institutions of higher education (whether proponent or participant) team members must be listed associated to the participant or proponent research institution(s).

3.2 Criteria for supervision of PhD students
